DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 1-4, 9, 11, 15-18, 21-23, 27-29, and 32-37 have been considered but are most in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-4, 9, 11, 15-18, 21-23, 27-29, and 32-37 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contain subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 1 recites, "and the convex outer portion having a fifth radius of curvature *substantially similar to or larger* than the first radius of curvature". This limitation was not found in the specification. No mention of a fifth curvature in comparison to a first curvature was found in the specification, let alone a fifth curvature period. Although figures 5 and 6 show the curvatures seem kindof similar, it is difficult to tell the exact curvatures from the figures. The figures certainly do not show support for "or larger", (which encompasses the first curvature and larger to infinity) as a full range of curvatures bigger than center members top surface has not been shown or disclosed. Claims 2-4, 9, 11, 15-18, 21-23, 27-29, and 32-37 depend upon claim 1 and inherit all problems with the claim.

Art Unit: 3738

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-4, 9, 11, 15-18, 27-29, and 32-37 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-4, 9, 11, 14-18, 24-26, and 29-34 of copending Application No. 10/806,961. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are merely broader than the copending application claims. The present invention claims a joint prosthesis, wherein the copending application is more specific to an intervertebral joint prosthesis.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 9, 11, 15-18, 27-29, and 32-37 are rejected under 35 U.S.C. 102(b) as being anticipated by Judet (US 5,314,485). Judet discloses an implant (1) comprising a first member (2) comprising a concave recess (23) a second member (4) having a convex projection (40) with a smaller radius than the concave recess (see fig.1, 2), and a center member (3) having a convex surface (barrel surface) for mating with the concave recess and a concave center portion (32) and convex outer portion (barrel surface) to mate with the second member having similar curvatures. See figures 1 and 2 for remaining dependent claims.

Claims 1-4, 9, 11, 15-18, 21-23, 27-28, and 32-36 are rejected under 35 U.S.C. 102(b) as being anticipated by Buechel et al. (US 3,916,451). Buechel discloses an implant (fig.2) comprising a first member (200) comprising a concave recess (see fig.2) a second member (100) having a convex projection (150) with a smaller radius than the concave recess (see fig.2), and a center member (300) having a convex surface (306) for mating with the concave recess and a concave center portion (305) and convex outer portion (306) to mate with the second member having similar curvatures. See figures 1 and 2 for remaining dependent claims.

Claims 1, 9, 15-18, 21-23, 27-28, 32-33 are rejected under 35 U.S.C. 102(b) as being anticipated by Zdeblick et al. (US 2002/0082701 A1). See figure 16 and respective portions of the specification. Zdeblick discloses an implant (110) comprising a first member (112) comprising a concave recess (see attachment 1) a second member (114) having a convex

Art Unit: 3738

projection (see attachment 1) with a smaller radius than the concave recess (see fig.16), and a center member (116) having a convex surface for mating with the concave recess and a concave center portion and convex outer portion to mate with the second member having similar curvatures, see attachment 1.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cheryl Miller whose telephone number is (571) 272-4755. The examiner can normally be reached on Monday-Friday 7:30am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine McDermott can be reached on (571) 272-4755. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
